ACTION: Notice of public meeting.

SUMMARY: The Gulf of Mexico Fishery Management Council (Council) will convene a public meeting of the Reef Fish Stock Assessment Panel.

DATES: This meeting will begin at 1:30 p.m. on October 15, and will conclude at 5:00 p.m. on October 17, 1996.

ADDRESSES: The meeting will be held at the NMFS Southeast Fisheries Science Center, 75 Virginia Beach Drive, Miami, FL.

FOR FURTHER INFORMATION CONTACT: Steve Atran, Population Dynamics Statistician; telephone: 813-228-2815.

SUPPLEMENTARY INFORMATION: The Reef Fish Stock Assessment Panel will review a new stock assessment for vermilion snapper, an update to the 1995 stock assessment for red snapper, and available biological information and landings data for amberjack species. For red snapper, the panel will recommend a range of allowable biological catch (ABC) which is consistent with a rebuilding schedule for this stock. For the other species, the panel may recommend an ABC range if there is sufficient biological information available to determine an ABC range for achieving optimum yield, or they may identify future research needs.

Under the Reef Fish Fishery Management Plan's framework procedure for setting total allowable catch (TAC), the Council may implement through a regulatory amendment, for species where an ABC range has been specified, a TAC which is allocated between the recreational and commercial sectors, and quotas, bag limits, size limits, and other measures needed to attain TAC. If an ABC range and TAC is not specified, the Council must use the more lengthy plan amendment process to implement any changes to management measures.

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Anne Alford at (see ADDRESSES) by October 8, 1996.
